Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Elements of Pharmacology Consequently therapeutics is only concerned with these substances which are used in the cure of disease. Many substances which cause ill consequences through their chemical action, but which find no employment as remedies - as, for example, carbonic oxide - are called poisons, and are referred to the special science of toxicology. Many substances belong to both these sciences, seeing that the distinction between the curative and the injurious effects of their action is only indicated by differences of degree. The list of therapeutic substances is, moreover, very variable. Many substances often disappear from the field after short use, others take their place, and in all probability meet the same fate, sooner or later. In Some countries remedies are in use, the very names of which are scarcely known in others. In fact, each physician has his own set of remedies.
