Read on your PC, Mac, Smart Phone, Tablet or Kindle Device Ketogenic Diet: The Ketogenic Diet To Lose Weight Now The ketogenic diet is not some fad diet that has no basis in scientific research. Instead, it is a diet that uses prior knowledge and emerging science to improve health and offer real benefits to a wide range of people, including those who have serious metabolic disorders. Unfortunately, some so-called health enthusiasts still consider it just another high protein, low carb diet. But, in real, this diet uses the increased fat intake approach, focusing on natural fat sources like butter, meat, lard, olive and coconut oils. While the diet favors protein intake, the amount of protein included in the average ketogenic diet is quite moderate, particularly when compared with the traditional high protein diets. Carbs, on the other hand, are severely restricted. In the Standard American Diet, also known as SAD, the average intake of carbs can be as high as 65 of the overall daily calorie intake. In the ketogenic diet, this number will be restricted to around four percent of the daily calorie count. A typical meal in the ketogenic diet might only contain a small amount of protein and natural fat, coupled with some leafy greens or other non-starchy vegetables. This book not only contains information about the basics of the ketogenic diet, but it also explains how this diet can...
