

## Programming a REAL Internet Site with ASP and HTML Book I HTML and Basic ASP

By Marcelo Bosque

iUniverse, Inc. Paperback. Condition: New. 168 pages. Dimensions: 9.1in. x 6.2in. x 0.5in. I've seen many programming books in my life. All of them have something in common: They just explain theory and show examples made up by the author. Some of them are inspired and their examples are smart. Some others look completely beyond reality. I wanted to make a different book, so I started to think in alternative ways to explain the subject. I am a university professor, so I asked some of my students questions like: Imagine a cool programming book. What are you expecting to learn in an utopist work like that? Most of them wanted to read something Understandable. So, the first premise of this book was: TO MAKE SOMETHING EASY. The second point they marked is that they wanted to learn things based on real facts. So, the second premise for the book was: TO MAKE SOMETHING BASED ON A REAL CASE. That's how the main idea of this book came to light. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
